

ANISH TOTE

STUDENT

9604520679

anishtote5@gmail.com

SUMMARY

Electronics and Communication Engineering student with strong practical experience in embedded systems, PLC-based automation, and chatbot development. Skilled in Python and C, with knowledge of supervised machine learning and model training. Hands-on experience through industrial internships and real-world projects focused on automation and system efficiency. Passionate about building cost-effective AI-driven and embedded solutions.

SOFT SKILLS

- Leadership .
- Communication .
- Problem Solving .
- Adaptability .
- Confidence .
- Active Listening .

SKILLS

- Programming: C, Python
- Embedded Systems: 8051, C8051F340 Microcontrollers
- Automation: PLC Programming (Ladder Logic)
- Machine Learning: Supervised Learning, Model Training (Basic)
- Technologies: REST APIs, Webhooks, Chatbot Development
- Tools: VS Code, GitHub, Streamlit

ACHIEVEMENTS

- Top 3 Rank Holder (3 years)

CERTIFICATIONS

- AWS Elastic Beanstalk Fundamentals
- Cloud Computing Basics
- Infosys Springboard Certifications
- Be10x Certified AI Tools Expert.

WORK EXPERIENCE

Student Intern

MAY 2023 - JULY 2023
JUNE 2024 - AUGUST 2024

Logicon Technosolutions Pvt Ltd

- Worked on industrial automation systems using PLC
- Developed and tested ladder logic programs
- Assisted in control system design and debugging
- Gained hands-on experience in real-time industrial environments

EDUCATION

B.Tech – Electronics and Communication Engineering

AUGUST 2024 - JULY 2027

MIT World Peace University (MIT-WPU), Pune
CGPA: 7.5

Diploma – Electronics and Tele-Communication Engineering

JUNE 2021 - JUNE 2024-

Pimpri Chinchwad Polytechnic , Pune : Percentage 89.36 %

PROJECTS

Automatic Bottle Filling Machine

- Developed PLC-based automation system using ladder logic
- Integrated sensors and timers for process control
- Reduced manual intervention by ~60%

Pipelined MAC Array for Image Processing

- Designed high-speed MAC architecture
- Improved throughput using pipelining
- Applied digital design techniques for optimization

Telegram / WhatsApp Chatbot for Automation

- Developed chatbot using Python and webhook architecture
- Deployed on Telegram for real-time interaction
- Implemented automated query handling system
- Explored WhatsApp Business API constraints and deployment
- Designed scalable chatbot logic for business use
